Technology

Software - Application

Paycom Software, Inc. provides cloud-based human capital management (HCM) solution delivered as software-as-a-service for small to mid-sized companies in the United States. It offers functionality and data analytics that businesses need to manage the employment life cycle from recruitment to retirement. The company's HCM solution provides a suite of applications in the areas of talent acquisition, including applicant tracking, candidate tracker, background checks, on-boarding, e-verify, and tax credit services; and time and labor management, such as time and attendance, scheduling/schedule exchange, time-off requests, labor allocation, labor management reports/push reporting, and geofencing/geotracking, and Microfence, a proprietary Bluetooth. Its HCM solution also offers payroll applications comprising better employee transaction interface, payroll and tax management, Paycom pay, expense management, mileage tracker/fixed and variable rates, garnishment management, and GL concierge applications; and talent management applications that include employee self-service, compensation budgeting, performance management, position management, and Paycom learning and content subscriptions, as well as my analytics, which offer employment predictor reporting. In addition, its HCM solution provides manager on-the-go that gives supervisors and managers the ability to perform a variety of tasks, such as approving time-off requests and expense reimbursements; direct data exchange; ask here, a tool..
